..PRICE LIST..

OF

FRUIT AND ORNAMENTAL TREES

SMALL FRUITS, EVERGREENS, ROSES, ETC.

OF THE

CALIFORNIA NURSERY COMPANY

NILES, CALIFORNIA

Season of 1901-1902

December 1st, 1901

LOCATION

ONE-HALF MILE NORTH OF NILES STATION, CENTRAL PACIFIC RAILROAD
TELEPHONE CONNECTION FROM STATION TO OFFICE

OAKLAND, CAL.
PACIFIC PRESS PUBLISHING CO.

To Correspondents

- 1st. All orders should be sent in as early as possible.
- 2d. Orders should be legibly written out on a separate sheet and not mixed up in the body of the letter, thereby saving us a great deal of trouble, and tending to prevent mistakes.
- 3d. The articles in the following list will be furnished at the annexed prices only when the quantity specified shall be taken. FIFTY, however, will be furnished at the HUNDRED rate, and FIVE at the TEN rate. In no case does this mean so many trees of assorted classes, but refers only to one class of assorted varieties, for instance, 5 Apples, or 5 Pears, or 5 Plums, of different varieties, but not 2 Apples, 2 Pears, and 1 Plum.
- 4th. Where particular varieties are ordered, and particular ages and sizes of trees, kind of stock, etc., it should be stated whether, and to what extent, substitution will be allowed in case the order can not be filled to the letter. Where no instructions in this respect accompany the order, we shall feel at liberty to substitute other varieties as nearly similar as possible. If the selection of varieties is left *entirely* to us, we shall endeavor to send only such sorts as are acknowledged to give general satisfaction.
- 5th. All trees and plants are carefully labeled, and securely packed in the best manner, for which a moderate charge, sufficient to cover cost of material only, will be made; but no charge is made for the delivery of packages at the railroad or express offices at Niles.
- 6th. It is requested that explicit directions for marking and shipping packages accompany each order. When it is left for us to choose the mode of conveyance, we will exercise our best judgment; but as all articles are at the risk of the purchaser after being shipped, we must not be held responsible for any loss or delay that may occur through the negligence of the forwarders.
- 7th. Our customers are requested to notify us immediately of any errors that may be committed in filling their orders, so that we may at once rectify the same, as we desire to conduct our business in all respects satisfactorily to those who favor us with their confidence.
- 8th. Orders from unknown correspondents must be accompanied by the cash, or satisfactory reference. Orders to be sent C. O. D. must be accompanied by at least one-half the amount in cash; otherwise, they will receive no attention.
- 9th. Remittances may be made by draft on San Francisco, Wells, Fargo & Company's and post-office money orders on Niles, or cash by express, prepaid.
- 10th. Orders priced at single rates, and not exceeding four pounds in weight, can be forwarded by mail, postage paid; but when possible we recommend having them sent by express, as we are then able to send much stronger and better plants.

All communications to be addressed to

CALIFORNIA NURSERY COMPANY, NILES, CALIFORNIA.

Remarks

We have pleasure in submitting herewith our price list for the coming season (Seventeenth Edition). It is our aim and intention, as hitherto, to supply only the best stock at the lowest prices, and the stock in hand for the new season is larger and more varied than ever before. We invite all to visit the Nursery, which is the largest, by far, of any on the Pacific Coast, whether as intending purchasers, or otherwise. If parties will notify us of the time of their arrival at Niles, we will have conveyance at station to meet them.

To reach our Nursery from San Francisco, take the broad-gauge ferry-boat for Oakland, leaving at 8:00, 8:30, and 9:00 A. M., and 3:30, 4:00, 4:30 and 6:00 P. M. These make close connections with through trains direct to Niles. From Sacramento and all points centering there, the train leaving at 10:25 A. M. for San Francisco, via Lathrop, Tracy, Livermore, etc., should be taken. From San Jose and its southern connections, trains leaving at 5:45, 6:15, and 9:20 A. M., and 12:35 and 4:35 P.M.

CALIFORNIA NURSERY COMPANY.

OFFICERS:

WILLIAM J. LANDERS, President, JOHN H. HENN, Secretary,

t, H. W. MEEK, Vice-President,
CENTRAL BANK, Oakland, Treasurer.
JOHN ROCK, Manager.

DIRECTORS:

WM. J. LANDERS, San Francisco, HORRY W. MEEK, San Lorenzo, EGBERT B. STONE, Elmhurst,

W. G. PALMANTEER, Oakland,
A. C. HAMMOND, JR., San Francisco,
JOHN H. HENN, San Francisco,
EDWARD E. USLAR, Niles.

Special Notice

Those only who can show a certificate of recent date, with our signature and the seal of the company attached, are authorized to solicit orders for us. We wish to call special attention to this notice, as we know it has heretofore been the practise of unprincipled persons to procure the catalogues of prominent nurseries and take orders in their names, which they fill with poor stock bought elsewhere. If our patrons, will notify us of any person whom they have reason to believe is not a regularly appointed agent, we shall consider it a favor.

Hints on Transplanting

The many excellent treatises on Fruit Culture which have appeared within the past few years-one or more of which should be in the hands of every person intending to plant—render it almost unnecessary to give any directions in that line; yet we are so frequently asked for advice in this way, that we have

concluded to offer a few general remarks.

The situation of the orchard having been decided on, the ground should be deeply plowed, subsoiled and thoroughly pulverized. The holes should be dug at least a foot larger in every direction than actually required by the roots, when spread out in their natural position. In planting, the top soil should be broken down into the hole, and worked carefully in between every root and fiber, filling up every crevice, that every root may be in contact with soil, and the whole made quite firm as the filling up progresses. The tree, when planted, may in light soils stand from two to three inches deeper than it stood in the nursery; but in heavy-clay or wet ground it is advisable to have it stand at the same height as it was before transplanting.

On account of our long, hot, dry summers, we have found it beneficial to shade the sunny side of the tree with a board or shake stuck in the ground a few inches away from it, for the first two or three years. The tops should be shortened in more or less, in proportion to size and variety of tree and condition of

A work, "California Fruits and How to Grow Them," by Prof. E. J. Wickson; the "Raisin Industry," by Prof. Gustav Eisen; and "Grape Culture and Wine Making," by Geo. Husmann, will be found very useful to all horticulturists, written as they are for this coast, and by authors of wide local experience.

RULE—SQUARE METHOD.—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill, which, divided into the number of feet in an acre (43,560), will give the number of plants or trees to the acre.

RULE—EQUILATERAL TRIANGLE METHOD.—Divide the number required to the acre "square method"

by the decimal .866. The result will be the number of plants required to the acre by this method.

PRICE LIST

OF

CALIFORNIA NURSERY CO.

SEASON 1901-1902

Prices quoted herein are for quantities and sizes specified; for extra sizes, varieties, or quantities other than mentioned, special prices will be made. Estimates cheerfully furnished on such lists.

For index, see last page of Catalogue.

FRUIT DEPARTMENT

All our Fruit Trees are grown on WHOLE Seedling roots. The advantages of these in promoting the health and thriftiness of trees over others grafted on pieces or sections of roots, or budded on stocks grown from cuttings, is acknowledged by the best authorities, and is easily apparent to the most casual observer. All two-year-old trees are branched low and are stocky, having been cut down or headed back when yearlings, two feet aboveground, except where noted.

All of our Apple Trees and Grapevines are fumigated with hydrocyanic gas when dug, so are the buds, scions, and cuttings, prior to budding, grafting, or planting out in Nursery. This positively kills any insects that may be thereon, without any injury to tree or vines. We have erected on our grounds a new Fumigating House, with three compartments, so that we can disinfect, at any time, either 50 trees or 10,000.

WOOLLY APHIS PROOF APPLE

We have grown here in our Nursery the past fifteen years, Northern Spy and Winter Majetin Apple, on their own roots. These are the two varieties principally used in Australia, where the Woolly Aphis is so very destructive on Apple Trees. Here in California there are only certain local-

ities where the Woolly Aphis does any injury, in affecting the growth of the apple trees; some varieties are more subject to the disease than others, and, consequently, suffer more.

We have propagated for the first time this season trees of the above two varieties, on their own roots. Any other variety can be grafted to these trees, either aboveground, or in the limbs. This will insure the roots of the tree perfect immunity from the Woolly Aphis.

The Northern Spy and Winter Magentin are very strong and robust growers, make a very large root-system, much stronger than the ordinary seedlings, Apples are grafted on. Varieties of weak and slow growth make large trees when grafted on these two varieties.

Price, 1-year-old trees, 3 to 4 ft., each, 75 cents. Price, 1-year-old trees, 2 to 3 ft., each, 50 cents.

ORNAMENTAL DEPARTMENT

Deciduous • Ornamental • Trees

TRAINED TREES

This class includes a variety of large-sized trees, whose straight, regular stems were headed back or cut down to a uniform height of nine feet, and handsome, well-formed heads grown thereon. They are in splendid shape for planting on avenues, streets, or roadsides, for immediate effect. With ordinary care, little or no loss should occur in moving them, as they have been frequently transplanted.

Evergreen Trees and Shrubs

Nearly all the plants mentioned under this heading have been transplanted once or oftener, thereby adding greatly to the certainty of their growing. In order to reduce the amount of soil and consequent high freight charges, especially in shipping to distant points, we have grown those varieties most in demand in pots.

Palms, Dracaenas, Agaves, Yuccas, Etc.

Palms

Palms have now become almost indispensable in all decorations, whether for apartments, or conservatories, or the production of tropical effects in landscapes. When planted out, no class of plants makes such a grand display, and none are of more easy culture. Rich soil, mulching, and watering will in a short time produce grand specimens.

While our main stock of these highly desirable garden ornaments is grown in the open ground, thereby obtaining the finest plants, we also cultivate more or less of each variety in pots or boxes. These are well-established, well-furnished specimens, suitable for hall or house decorations, or, where immediate effect is desired out-of-doors, they can be used to great advantage, being almost absolutely safe from any set-back. We distinguish the hardy sorts with an *.

A list of large specimen plants, of palms, etc., not enumerated in this catalogue, will be mailed upon application.

BUSH ROSES

The plants offered are strong and vigorous, have been grown entirely in the open ground, and consequently will not require the careful nursing necessary to those propagated under glass in three months' time, and sold at low rates. They can not fail to give entire satisfaction the first summer after planting. From November to March they can be shipped in a dormant state, packed in moss. For culture best adapted to each class, we refer to our Descriptive Catalogue No. 2. The varieties which we can furnish in Tree or Standard Roses, will be found listed separately.

NEW ROSES

Price, each, 50 cents.

The following are offered with the raiser's description, and are the productions of celebrated growers.

Admiral Dewey (Hybrid Tea)—Color a beautiful light blush pink, clear

and distinct; free bloomer and very fragrant.

Gardenia (Evergreen)—Strong grower with large green foliage. Flowers produced singly on stems one-half to one foot long; when in bud hardly distinguishable from Perle, bright yellow, and when open cream color, three to three and one-half inches in diameter, incurving towards evening to perfect imitation of Gardenia, or Cape Jasmine, as to shape or color, hence its name. Flowers are delightfully fragrant, and produced freely.

Liberty (Hybrid Tea)—Undoubtedly the finest crimson rose of modern times. Color pure crimson scarlet; a steady and constant bloomer; flowers of large size, beautiful elongated form. A remarkable keeper when cut, preserving its brilliancy of color without change; very fragrant.

General Collection

Price, each, 25 cents; per 10, \$2.00.

TEA OR EVER BLOOMING

Belle Lyonnaise, lemon yellow. Bon Silene, deep rose. Bougere, violet crimson, shaded lilac. Bridesmaid, clear bright pink. Catherine Mermet, clear shining pink. Charles Rivolli, brilliant carmine. CLIMBING ROSES

These will be found described in the various preceding classes to which they belong. We collect them under this heading for the convenience of our patrons. They are very useful, and highly valued for training over arbors, trellises, and verandas, and as screens for unsightly objects, such as

fences, walls, etc., they can not be surpassed.

Baltimore Belle, Prairie. Climbing Aimee Vibert, Noisette. Climbing Devoniensis, Tea. Climbing La France, Hyb. Tea. Climbing Niphetos, Tea. Climbing Perle des Jardin, Tea.
